

Full Stack Web Developer - Knowledge Graph (m/f/d)

Welsper Profile with its 360-years history is an international metal-processing company that has over 2,400 employees and generates approx. one billion Euro sales per year. This family-owned company packed with implicit and explicit knowledge is waiting for you.

In this role your main responsibility is to build-front end data-applications from our company-wide Knowledge Graph.

WE ARE LOOKING FOR YOU

at the location Gresten (Lower Austria) / Co-office Vienna | Amstetten | St. Pölten

Your tasks:

- Developing and operating web-based data applications
- Loving our innovative knowledge graph
- Responsible for front end and back end engineering within the MS Azure data platform
- Being a proactive and accountable key player in the agile data analytics team
- Consulting with well-established external implementation partners
- Requirements engineering with key stakeholders in sales, procurement, production etc.

Your profile:

- You have
 - strong experience in full stack web development (including Python)
 - hands-on experience with front end technologies (HTML5, JS, Angular, React or Next.js)
 - a strong understanding in database design and security requirements
- You may have
 - proficiency in version control and collaborative platforms e.g. Azure DevOps
 - experience in working in agile teams (SCRUM)
 - experience in data science and visual analytics
 - strong interest in global supply chains

What we offer you:

- Flexible working hours and the possibility for remote office / co-working office.
- Support in public transportation costs (Klimaticket).
- Work in an innovative team consisting of data scientists, data analysts as well as creative and proactive thinkers and your team reports directly to main decision makers.
- Gain practical insights and skills in one of the most trending topics of Gartner's Hype Cycle for AI.
- Possibilities for training and personal development (conferences, trainings, workshops).
- Partnering with universities and external consultancies.
- An attractive salary based on the collective agreement of the metalworking industry – for this position a minimum salary of € 3.728,36 gross per month is foreseen (for master's degree).
